

Assignment A2- Street Crimes Project

At this web address: <https://data.police.uk/data/> you will find crime data collected by the UK police.

Download a data set in a `CSV` format and use (some of) the data in it to create a graph database.

Based on your data sample, show

- which is the location with highest number of crimes?
- which is the most common crime?

Use Cypher and the Neo4j browser tools.

Save the script in a file and upload it to Peergrade.

Note

This assignment does not bring study points.
